

Kōpara Hub Term 2

Rooms 5, 6, 7, 8, 9A, 11 and 12

Term 2 has been a busy one for Kōpara Hub.

The teachers have been completing their BSLA Structured Literacy training and all students have been working hard on their phonics, small group reading lessons and vocabulary building through stories.

We are also well underway with the new Maths curriculum and have been using our new workbooks to support the programme. Next term the children will get a new workbook and the old one will go home after learning conversations so it can be used at home. Not all pages are completed in class so there will be plenty of things that can be done.

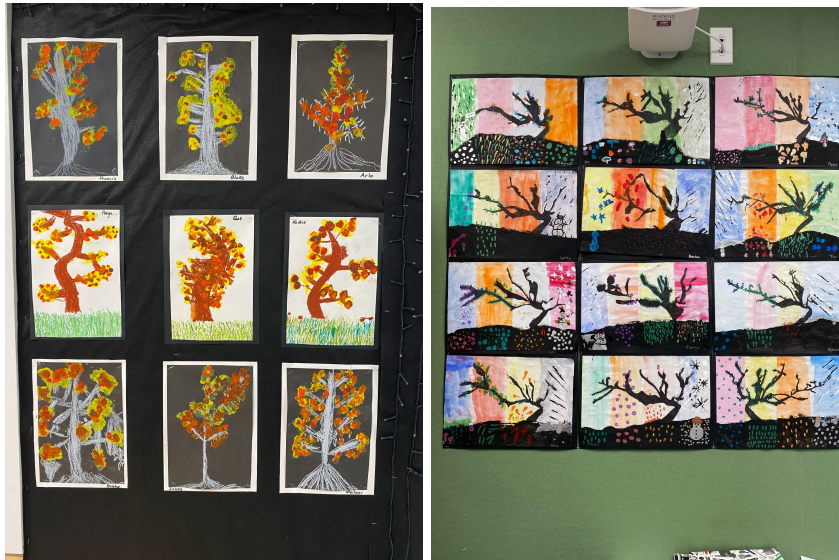

Each class has been working on learning their pepeha and have been practicing it in class. They are all displayed beautifully in the classrooms.

Inquiry

This term we have been learning about the Seasons and Weather (Tāwhirimātea). Some classes started to look at the Water Cycle and learned some big words like evaporation, condensation and precipitation.

Next term our focus will be on Rūamoko and finding out about volcanoes and earthquakes.

Matariki

This is always a lovely time for classes and whanau to come together and this year we started at 7am with waiata and karakia. After breakfast everyone went to different classes to do Matariki activities. There were so many great art and craft activities as well as baking and an exciting football tournament. The afternoon was an opportunity to reflect and rest after a busy day.

Library Opening

We had a fun day dressing up as book characters for our library opening and all the classes are enjoying spending time in the new library.
